

NoWeed

NoWeed virtually eliminates the need for any trimming, mowing, or weeding around or nearby landscaping obstacles. Environmentally friendly.

The **NoWeed** system can be customized for any weed prevention application including: fence posts, sign posts, mailboxes, light poles, guard rails, fence-lines, planters, garden beds, and more.

NoWeed control products are designed to help the homeowners, governmental agencies, municipalities, road departments, airports, parks, commercial real estate and private businesses save labor costs. Our eco-friendly, weed prevention product virtually eliminates the use of harsh chemicals to control weeds creating an impermeable barrier against unwanted grass and weed growth around utility poles, fire hydrants, water pipes, gas pipes, etc. **NoWeed** is made from recycled rubber tires.

Features

- Heavy enough to remain in place while mowing nearby or airstrips
- Economical: Pays for itself within the first few months
- Resistant to extreme temperature variations, UV light and moisture
- Absorbs radiation with no reflection.
- Thermal radiation naturally and gently kills off underlying vegetation
- Environmentally-friendly: Made in Canada from recycled tires
- Easy to install, easy to move and reinstall, if needed.
